

# Campus Master Plan

The County of Los Angeles has hosted two of three community meetings which were held on Thursday, June 19, and Wednesday, November 5, 2014, to introduce the overall Master Plan concept for the OVMC Campus. This Master Plan will be a guideline for future construction and growth for the OVMC Campus. In the first community meeting the Master Plan concept was introduced and the County received great feedback from the community.

During the second meeting, the County presented two options for a Master Plan including the “Boulevard” option and the “Nature’s Edge” option. These options were preferred based on the community’s input from the first meeting. Both options focus on creating a more sustainable open green campus, taking into consideration the expanding health needs of the public.

The final community meeting for this process is anticipated to be held in early 2015.
